## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to Electronic Cooling Apparatus, classified in class 361, subclass 699.
  - II. Claims 8-17, drawn to a Motor-driven Pump, classified in class 417, subclass 423.7.
  - III. Claims 18-21, drawn to a Radiator, classified in class 165, subclass 104.33.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of subcombination (Invention II) as claimed at least in part because the subcombination recites details of the pump (rotor, bearing, stator, for example) not required by the combination (Invention I). Likewise the combination as claimed does not require the particulars of subcombination (Invention III) as claimed at least in part because the subcombination with respect to the Radiator recites, "two liquid tanks".

The subcombination (Invention II) has separate utility such as pumping fuel from the

ground to a vehicle. Likewise, the subcombination (Invention III) has separate utility such as a being used in a system to cool mechanically heated parts.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to David Spaw (#34,732) on 7/14/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachary M. Pape whose telephone number is 571-272-2201. The examiner can normally be reached on Mon. - Thur. & every other Fri. (8:00am - 5:00pm).
